## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over the German patent in view of Strawsine. The German patent discloses the claimed invention except for the motor being connected to the center hub. Strawsine teaches that it is known to provide a "fan motor 58 having a blade 59" as set forth at column 3, line 46. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the hub of the German patent to be connected to the motor, as taught by Strawsine in order to provide the conventional direct connection of the motor to the fan.

3. Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over the German patent in view of Strawsine as applied to claim 1 above, and further in view of Bohanon, Sr. Further, the German patent discloses the claimed invention except for the backdraft assembly. Bohanon, Sr. teaches that it is known to provide a fan enclosure with a louvered shutter arrangement as set forth at column 3, line 66 to column 4, line 19. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the fan of the German patent with the backdraft assembly, as taught by Bohanon, Sr. for its obvious intended purpose.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 6,386,828. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims differ only in the omission of elements. It would have been obvious to one having ordinary skill in the art at the time the invention was made to omit element from a combination claim, since it has been held that omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art. *In re Karlson*, 136 USPQ 184.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
